THE COLLECTION

BIRKENSTOCK, INVENTOR OF THE FOOTBED

TRENDS COME AND GO THE REALLY GOOD THINGS LAST FOREVER

Since 1774 we at BIRKENSTOCK, the inventor of the footbed, have been thinking about how we can make the lives of our customers more pleasant and enrich them - with good footwear for all life situations.

To this end, we manufacture our sandals in Germany under the best conditions for our brand in our own production facilities with a high proportion of manual work. Depending on the model, a sandal goes through up to 17 work steps. With the closed models, there are more than 100 expertly executed steps to reach the finished product. The closed shoes are manufactured in Portuguese manufacturing according to the principles of centuries-old traditional craftsmanship.

But no matter whether it's manufacture or industrial production - all BIRKENSTOCK products meet the highest quality standards that can be found in the global shoe industry. We make no compromises either in terms of the materials used - cork, natural latex, copper, brass, wool felt and the best leather - or workmanship. The raw materials come from sustainable sources. As long as the natural conditions allow, we obtain them from Europe.

OUR FOOTBED

IS THE BASIS OF ALL BIRKENSTOCK PROFESSIONAL PRODUCTS

The core of our products is our unique, anatomically shaped footbed. BIRKENSTOCK invented the footbed and also established the meaning of the word „footbed“ as it is commonly known today. At the end of the 19th century, Konrad Birkenstock had a visionary idea: the production of a footbed insole from a flexible cork-latex mixture - an alternative to the rigid inlays that previously had mainly been made out of metal. The footbed is not only a unique, revolutionary product concept that has paved the way for a completely new market. It is also the guiding principle and reference point for everything we do. Today and in the future.

1 FOOTBED EDGE

Protects the toes against external influences

2 TOE GRIP

Supports the natural toe roll-off in motion

3 TRANSVERSE ARCH SUPPORT

Stabilizes the metatarsal bone and ensures that the foot has a naturally straight and solid stance

4 MEDIAL LONGITUDINAL ARCH SUPPORT

Underpins the inner longitudinal arch of the foot and acts against lowering of the inner foot edge

5 LATERAL LONGITUDINAL ARCH SUPPORT

Supports the outer longitudinal arch and improves the positioning of the midfoot and rear foot on the footbed

6 DEEP HEEL CUP

Embeds the heel and keeps it firmly in its natural position

BIRKENSTOCK®
PROFESSIONAL

Energy absorption
around heel (E)

Water-repellent outer material, at least 80 minutes without
water penetration (WRU)

Penetration-resistant (non-metallic) (P)
and slip-resistant outsole (SRC)

Oil- and gasoline-resistant
outsole (FO)

Steel toe cap (200 joules) with
scratch resistant material

WHAT IS ESD?

ESD stands for Electro Static Discharge. These shoe models actively ensure a permanent gentle discharge of their wearer (warning note: The ESD range is up to 35 MOhm, so it is not insulating!). - a quality feature that is clearly visible from the outside on BIRKENSTOCK Professional shoes through the circular, yellow ESD emblem with the hand in the black triangle.

PROVEN AS A PARTNER IN ELECTRONICALLY SENSITIVE FIELDS OF WORK

For people who work in the microelectronic field or with high-frequency technology, in addition to absolute cleanliness at the workplace, it is above all the protection of the product and working material against electrostatic influences that counts. This applies in particular to semiconductor technology, the automotive industry, physical research laboratories and electromedicine. This is why experienced technicians and engineers rely on ESD sandals and clogs from BIRKENSTOCK Professional.

ESD stands for Electro Static Discharge. These shoe models actively ensure a permanent gentle

discharge of their wearer (warning note: The ESD range is up to 35 megohm, so it does not have an insulating effect!). - a quality feature that is clearly visible from the outside on BIRKENSTOCK Professional shoes through the circular, yellow ESD emblem with the hand in the black triangle.

When looking at the insole, several round antistatic elements stand out. They are not noticeable when sandals and clogs are worn, but they compensate for potential electrical voltage differences between people and the working environment by permanently "grounding" the feet.

THE EUROPEAN ISO- NORMS

At the end of the 1990s, uniform standards for safety, protective and occupational footwear were established at European level, which is still valid today as standard in relevant areas. TÜV Rheinland tests our BIRKENSTOCK Professional models on the basis of the following standards:

- **EN ISO 20344** – requirements and test methods
- **EN ISO 20345** – safety footwear specification
- **EN ISO 20347** – specification occupational footwear

All shoes which, for example, have anti-slip, antistatic or comparable properties and which as a rule do not have a separate toe protection are referred to as professional shoes. Models with toe protection are classified in the categories protective shoes (with plastic toe cap, test energy up to 100 joules) and safety shoes (with steel toe cap, testing energy up to 200 joules). Our soles are tested by TÜV Rheinland and have to guarantee one of the following criteria:

- **SRA** – slip-resistance on ceramic tiles with cleaning agent
- **SRB** – slip-resistance on steel floor with glycerin
- **SRC** – resistance slip on ceramic tiles with detergent and on steel floors with glycerine

PROTECTION CLASS

S3

THE QS400, QS500, QS500 ESD AND QS700

Those who have special demands on their work equipment will no longer have to make any compromises in this respect in the future: BIRKENSTOCK presents its range of closed safety shoes.

All safety shoes meet the requirements of protection class S3

- Certified according to EN ISO 20345:2011
- Steel toe cap (200 joules)
- Scratch-resistant cap protection
- Penetration-resistant outsole (metal-free) **(P)**
- ESD or antistatic protection **(A)**
- Oil- and gasoline-resistant outsole **(FO)**
- Energy absorption in the heel area **(E)**
- Water-repellent outer material, at least 80 minutes without water penetration **(WRU)**
- Slip-resistant outsole **(SRC)**

With the replaceable BIRKENSTOCK footbed, the models provide secure support and relieve the strain on your feet, so that you can stand, walk and run comfortably for many hours a day, even in a challenging environment.

PROTECTION CLASS

02

THE Q0400, Q0500, Q0500 ESD AND Q0700

BIRKENSTOCK Professional footwear product line bridges the gap between a pleasant wearing comfort and increased protection requirements.

All professional shoes meet the requirements of protection class 02

- Certified according to EN ISO 20347:2012
- ESD or antistatic protection (**A**)
- Oil- and gasoline-resistant outsole (**FO**)
- Energy absorption in the heel area (**E**)
- Water-repellent outer material, at least 80 minutes without water penetration (**WRU**)
- Slip-resistant outsole (**SRC**)

With the replaceable BIRKENSTOCK footbed, the models provide secure support and relieve the strain on your feet so that you can stand, walk and run comfortably for many hours a day, even in challenging environments.

PROTECTION CLASS

SB & OB

THE A630, A640, SUPER-BIRKI AND PROFI-BIRKI

Whether in the kitchen, food industry, medicine or garden: with the practical clogs from BIRKENSTOCK, work is always easier. Each of our PU clog models is available in a variety of different colors. They are made entirely of polyurethane and feature the replaceable anatomically shaped BIRKENSTOCK footbed. In addition, model A640 is equipped with a steel toe cap.

- Certified according to EN ISO 20345:2011 (clog A640)
- Certified according to EN ISO 20347:2012
- Water-repellent
- Oil and grease resistant
- Anti-slip outsole
- PU clogs washable at 80°C
- Cork footbeds washable at 30°C
- PU footbeds washable at 60°C
- Easy-care and abrasion-resistant
- Footbed reorderable

CRITERIA

SLIP RE- SISTANCE

ESPECIALLY SAFE AND COMFORTABLE

In your profession, you have to be able to rely on your equipment one hundred percent.

Just like on the shoes from BIRKENSTOCK with the Super-Grip Outsole.

The models are particularly suitable for daily use in practices, hospitals, kitchens, restaurants and leisure centres. The slip-resistant super outsole consists of two components: a shock-absorbing midsole made of EVA plastic and a slip-resistant, oil- and grease-resistant rubber outsole. For those who likes extra comfort and safety.

CRITERIA

ESD

SAFE PROTECTION IN ESD AREAS WITH BIRKENSTOCK COMFORT

Working with sensitive high-frequency technology and electrical components in particular requires pronounced preventive measures. In combination with the professional ESD equipment of the workplace, the ESD models effectively protect against dangerous electrostatic discharges.

The damping bedding core in our ESD soft footbed, which is found in the Bilbao ESD and Kano ESD models, offers much more than a regular soft bedding. In the ESD models, an integrated antistatic agent provides optimum protection against electrostatic discharges.

All ESD articles have been tested by TÜV Rheinland according to the specifications of EN ISO 61340. They meet the requirements in the professional ESD range from 105 to 3.4×10^7 ohm (contact resistance).

BIG PLUS

**MAXIMUM PERFORMANCE
THROUGH MAXIMUM COMFORT**

Our comfortable and reliable footbeds with the corresponding characteristics of your professional or safety shoe are available as a replacement version so that you can give your best in everyday working life.
